

Problem statement[Send feedback](#)

Ninja was playing with her sister to solve a puzzle pattern. However, even after taking several hours, they could not solve the problem.

A value of N is given to them, and they are asked to solve the problem. Since they are stuck for a while, they ask you to solve the problem. Can you help solve this problem?

Example : Pattern for N = 4

```
****
***
**
*
```

Detailed explanation (Input/output format, Notes, Images)**Constraints:**

1 <= T <= 50

1 <= N <= 300

Time Limit: 1 sec

Sample Input 1:

```
2
3
2
```

Sample Output 1:

```
***
**
*

**
*
```

Explanation for Sample Input 1:

In the first test case, the value of 'N' is 3, so three rows are to be printed from 1 to 3 where each row starts from 3, which goes on till 1. Hence the answer is ["***", "**", "*"].

In the second test case, the value of 'N' is 2, so the two rows are to be printed from 1 to 3 where each row starts from 3, which goes on till 1. Hence the answer is ["***", "**"].

Sample Input 2:

```
2
4
5
```

Sample Output 2:

```
****
***
```

**

*

**
