

Problem statement[Send feedback](#)

Take the length(L) and breadth(B) of the rectangle as input and find its area.

Note:

Length and breadth must be an integer value and the area will always be in the range of integers.

Detailed explanation (Input/output format, Notes, Images)

Constraints:

$1 \leq L, B \leq 10^2$

Sample Input 1:

4 20

Sample Output 1:

80

Explanation of Sample Input 1:

Length of the rectangle is 4 and breadth is 20.
Hence the area of the rectangle is (length*breadth).
So the answer is $4*20=80$.
