

Problem statement[Send feedback](#)

Given an array of length N, you need to find and print the sum of all elements of the array.

Detailed explanation (Input/output format, Notes, Images)

Constraints :

$1 \leq N \leq 10^6$

Note for C++:

It is advisable to declare an array with a size that can accommodate all the elements, considering that N has a maximum value of 10^5 .

Sample Input :

3
9 8 9

Sample Output :

26
