Problem statement

Write a program to find the total number of a primes number in a given interval.
Given two integers S and E, count all primes between S and E.

Detailed explanation (Input/output format, Notes, Images)

Constraints

```
1 <= N <= 100
```

Sample Input 1 :

```
2 10
```

Sample Output 1 :

```
4
```

Explanation of Sample Input 1:

```
The prime numbers between 2 and 10
are 2,3,5 and 7
```

Sample Input 2 :

```
2 5
```

Sample Output 2 :

```
3
```

```
.
```
