Panagram Checking

Difficulty: **Easy**   Accuracy: **61.34%**   Submissions: **79K+**   Points: **2**

Given a string s check if it is **"Panagram"** or not.

A **"Panagram"** is a sentence containing every letter in the English Alphabet.

Example 1:

Input:
s = "Bawds jog, flick quartz, vex nymph"
Output:
1
Explanation:
In the given input, there
are all the letters of the English
alphabet. Hence, the output is 1.

Example 2:

Input:
s = "sdfs"
Output:
0
Explanation:
In the given input, there
aren't all the letters present in the
English alphabet. Hence, the output
is 0.
